USA 長期派遣留学生の報告&オネフンガ短期派遣の報告
By International Exchange Committee

Several students who went to Onehunga in summer told us about their experiences there. I was surprised to hear that it takes more than 16 hours to fly there from Japan. New Zealand is large and is filled with grass and trees. The number of sheep is larger than that of humans. They are very cute.

I was happy to see the poster of 2020 Tokyo Olympic Games on the wall in one of their photos. People in New Zealand are bigger than Japanese people. So the rugby players must be strong.

After listening to their presentation, I found that New Zealand is a very good country where people are kind and friendly.

On October 30th, Honoka told us about her life in the U.S. She studied there for about a year. She experienced a lot of things.

After telling us about the basic information of the U.S. such as its capital and the national flag, she told us about its food. The size of food there is larger than that of Japan. So they are too much for her. There are a lot of high-calorie food. So people are likely to gain weight.

Her favorite event in the U.S. is Christmas. The houses were decorated with many illuminations. On Halloween Day, she got a lot of sweets. They had various parties. She enjoyed them.

The school she attended was Frisco High School. They had four 90-minute classes a day. The class of dance was very enjoyable. She said, "Be positive! Take actions!"
